

JOIN THE CPE COMMUNITY

Canadian Prime Energy is working together to ensure a climate safe, toxic-free, global healthy environment. Whether you sign an online petition, attend an event or workshop, register for email updates, or write a letter to a decision-maker, you can make change happen

Our Vision:

A future where everyone can live and thrive in a healthy environment – protected for generations to come.

Our Mission:

Canadian Prime Energy is an environmental advocacy organization that works with government, industry, and individuals to defend awareness for clean energy, clean water, a safe climate, and healthy communities.

Every day, we work to create lasting and meaningful change. That's why we prioritize collaborating with global government, industry, and individuals. Because of this, our work is focused on

1. Encouraging government to enact policies to protect global health and environment.
2. Working with industry to build a clean, prosperous economy.
3. Empowering everyone to take action in their own daily lives.

And we do so by:

1. Being politically non-partisan

Our goal is to protect our environment, not to advance the goals of any specific political party. We work with political leaders of all stripes to create a world where we are proud to pass on to our children.

2. Sticking to the facts

Our work is based on research and a good understanding of the facts. In some cases, we do our own research, and in others, we consult peer-reviewed science and experts in their field to identify threats to our health and environment and good solutions. We are establishing ourselves as experts on issues that matter to everyone by asking questions and basing our work on the answers.

3. Getting results

Inspiring change is more than a tagline. We inspire change by promoting solutions to help protect everyone's health and environment. Our end goal is to do what's right for the environment.

4. Working cooperatively

We will work with businesses, communities, lawyers, scientists, advocates, and governments to inspire change. We know that advocacy is only one piece of the puzzle, and we strive to create partnerships and educational opportunities to help the world understand threats to our health and environment, and what role they can play in protecting them.

5. Following the law

We do not participate in unlawful activities.
